

## Queensborough

2006 Census

### A Note About Neighbourhood Profiles

All data in tables, charts, and text is from Statistics Canada, based on the 2006 and 2001 Census. References in the text to “more”, “fewer”, or “similar” are all based on comparisons with Census figures for the City of New Westminster as a whole. For assistance, please contact the City of New Westminster Planning Division at 604.527.4532 or [plnpost@newwestcity.ca](mailto:plnpost@newwestcity.ca).

### Distinct Neighbourhood Features

Queensborough is a fast growing part of the City, and saw a 21% increase in population between 2001 and 2006. It has more children and youth and fewer older adults. On average, its residents have significantly lower educational achievement but have a much higher household income profile. It has both higher household incomes, and larger households. Multiple-family households are more common. Residents are 11% less likely to take transit to work. Opposite to the City-wide trend, Queensborough’s share of trips to work on transit is decreasing. Fewer people live alone, and there are more couples with children. More households own their homes, and more homeowners are struggling with housing affordability. Renter households face less of an affordability challenge here than they do City-wide.

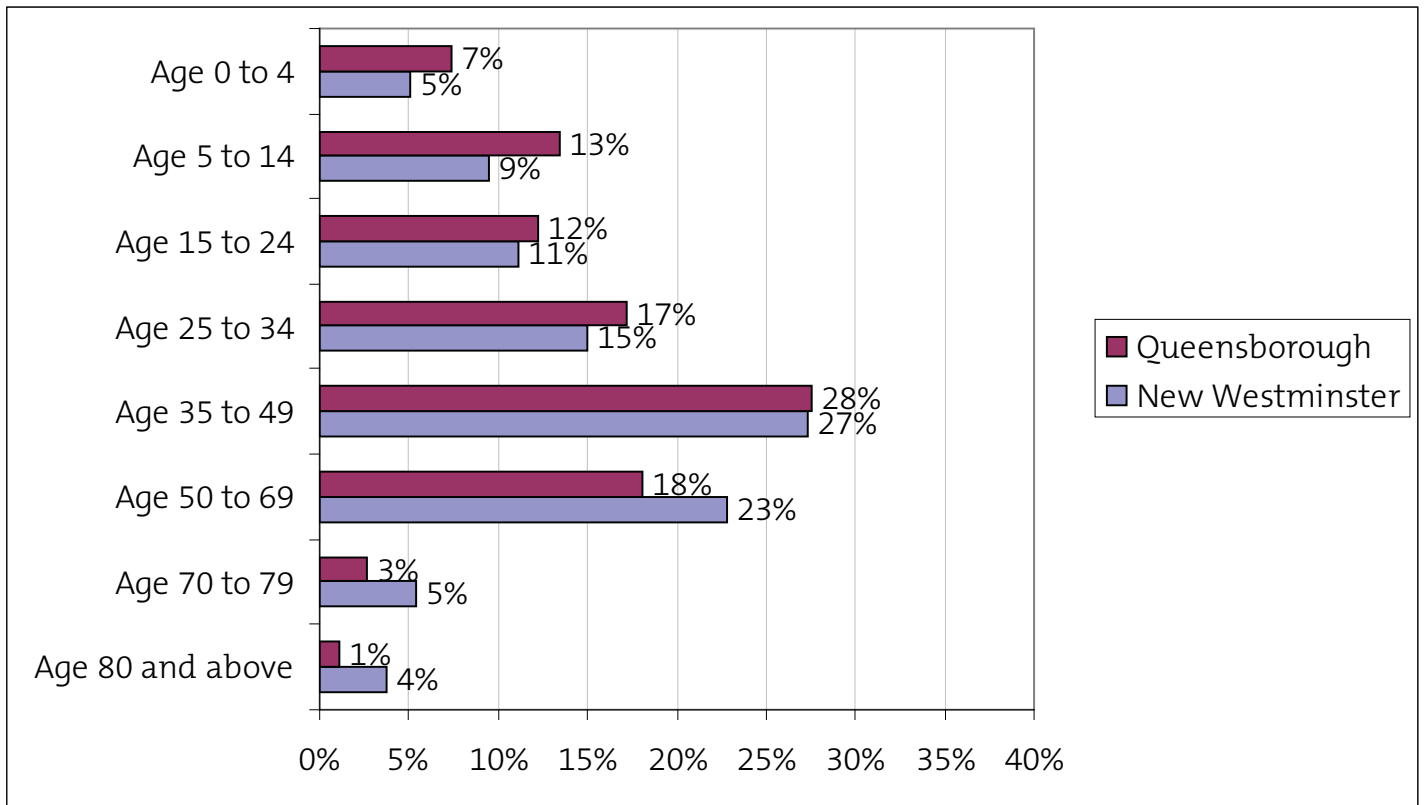

East Indian, Chinese, and Filipino are more common ethnic origins. English is much less prevalent as a home language, but its share is increasing significantly. English is spoken at home by 60% of residents, and Punjabi is spoken by 20%. Immigrants represent a higher share of the population but this share is decreasing in Queensborough at the same time that it is increasing City-wide. Immigrants are more likely to have come to Canada between 1980-2000.

### Note: How Numbers Add Up in the Census

The Census uses "random rounding" in its data, to round numbers either up or down to multiples of 5. Because of this, some figures differ slightly. For example, New Westminster population may be shown as either 57,850 or 57,845. Both totals can be considered correct and accurate.
