

Knitting with your fingers tutorial:

Directions:

When knitting with your fingers in this way, your fingers act as pegs on a loom. The yarn is wrapped around your fingers, then pulled over to create the stitch, just as if you were using a loom. Here's how:

1. Begin by threading the yarn behind your thumb and across your palm.

2. Wrap the yarn in front of your pointer finger, behind your middle finger, in front of your ring finger, and behind your pinkie.

3. Now wrap in the opposite direction, wrapping in front of your pinkie, behind your ring finger, in front of your middle finger, and behind your pointer.

4. Repeat Steps 2 and 3 until you have two rows of loops on each finger

5. Starting with your pinkie, grab the bottom yarn loop and pull it over your finger.

Repeat this across all your fingers. You will now have one row of loops left.

6. Repeat Steps 2 and 3 once more, weaving the yarn until you've added another row of loops.

7. Pull the bottom loops over the top loops as you did in Step 5. After completing several rows, you should have a nice little chain of knitting on the back of your hand.
