**ADDENDUM #1
NWRFP-23-02
Sapperton Substation Feasibility Study
New Westminster, BC**

This addendum modifies the Request for Proposal only as noted:

TITLE PAGE

Closing Time:

<CHANGE TO READ> “Thursday, April 13, 2023”

Please acknowledge this addendum in your Proposal.

ANSWERS TO SUBMITTED QUESTIONS

- Q1 In section 2.1, under the heading Feasibility Study Activities, what is the difference between items b) and d):
- b) Prepare a class 4 estimates with -30%/+50% accuracy
 - d) Develop pre-design estimate for recommended option
- A1 Proponents are required to prepare a class 4 estimates with -30%/+50% accuracy (both b and d are the same ask).
- Q2 The defined content for the feasibility study seems focused on the electrical aspect of the new substation, although some statements seem to hint at the expectation for all necessary engineering disciplines to be part of this effort. Can the City confirm the feasibility study is expected to include considerations from any discipline that may be required (i.e. Civil, Structural, etc.)?
- A2 The feasibility study should include all relevant disciplines in order to determine if it is feasible to develop a substation at this site and how big of a substation would be possible. The same relevant disciplines will also be required to derive an accurate class 4 cost estimate.

END OF ADDENDUM #1

Yours truly,

Patrick Shannon, SCMP
Purchasing Manager
City of New Westminster
