## Draft Principles:

- A. The heritage character of the Queen's Park neighbourhood is highly valued by the neighbourhood, the City and the region.
  - B. Most of the existing buildings and landscape features contribute to the heritage character of the neighbourhood and should be retained insofar as it is practical to do so.
  - C. New construction or renovations that replace or alter existing buildings or causes change to the existing landscape should be conditional on its compatibility with the heritage character of the neighbourhood.
- 

## Draft Strategies:

1. Identify and define the heritage character of the neighbourhood.
2. Provide a variety of financial and non-financial incentives to encourage the retention and restoration/renovation of existing buildings and landscape elements that contribute to the heritage character of the neighbourhood.
3. Develop mechanisms, including regulations that prevent, or policies that deter, the demolition of existing buildings and landscape elements that contribute to the heritage character of the neighbourhood.
4. Encourage support for heritage conservation by providing easy-to-access information and enhanced communication for residents and other interested parties.
