Insect resistant stainless steel screen

Higher spigot accommodates most watering cans

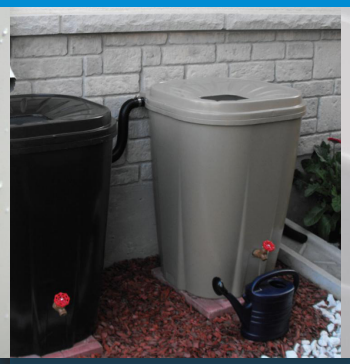

Overflow to 2nd barrel or splashpad

Resilient faucet/spigot

Easy multi-barrel installations

Stable footprint and childproof lid

FreeGarden RAIN®

The FreeGarden RAIN 55 gallon rain barrel is designed with the homeowner/gardener in mind; affordable, attractive, easy to move, easy to install, and easy to use.

With as many as three bins easily fitting in the back seat of a regular sedan, the average buyer doesn't need to arrange special transport.

The barrel's square shape is ideal for attractive flush to wall and corner installations.

The tall spigot placement accommodates most watering cans, and four additional spigot mount points are provided lower on the barrel.

Manufactured with a maximum of recycled content (varying by color option), the FreeGarden RAIN contains enough virgin resin to ensure optimal product durability and lifespan.

Capacity	55 gallons	208 litres
