Defining Lawn Watering Methods - Automatic vs. Manual Watering

Automatic	Manual
Automatic watering means applying water using an automated water delivery system that requires only minimal human intervention or supervision and typically employs mechanical, electronic, or other components and devices, including but not limited to timers, sensors, computers, or mechanical appliances.	Manual watering means applying water using a device or tool that is manually held or operated by a human, without automatic watering.

Examples of automatic watering	Examples of manual watering	
Mechanical device - water timer	Rain barrel	Watering can
		
Automatic irrigation system	High-pressure air pump manual sprayer	Handheld hose
		
Sprinkler with automatic shut off valves	Manual watering bottle	Self-watering ideas that are not automated
